The Art of Micro-Phlebology Symposium  
**March 11, 2017**  
A new concept for the treatment of small veins.  

New Techniques Based on Anatomical Principles  

- Become familiar with cutaneous pathophysiology and histology.  
- Techniques for unloading cutaneous venous hypertension.  
- Ultrasound and skin illumination techniques for cutaneous pathophysiology.  
- New Advances in sclerotherapy.  
- Incorporate thermal energy for the treatment of spider veins.  
- Anatomy of the reticular system.  
- Hand veins – Sclerotherapy, surgery or laser.  
- Face veins – Treating facial veins safely by sclerotherapy, micro-surgical techniques or laser. (Instruction in safe cosmetically superior techniques).  
- Veins in other locations.  
- Using ultrasound guided sclerotherapy for cutaneous pathophysiology and venous ulcers.  
- Micro-surgical techniques that every phlebologist should know.  
- Increase your practice revenue by adding cosmetic venous procedures to your practice.  

West Palm Beach Marriott Hotel $400 for Admission | $350 for Vein Experts Members  
Email or call for more information veinmedconsultants@gmail.com | 407-900-8346  
Online CME credits available | 3 AMA PRA Category 1 Credits™  

Space is limited to 100 attendees as we want to facilitate a personalized and interactive experience.
